

# Montana Fish, Wildlife & Parks

## MEMORANDUM

Date: **June 15<sup>th</sup>, 2012**

TO: **Planholders of the 'Greenhorn Creek Fish Barrier' Project, FWP # 12-24**

FROM: **Scott Blossom, PE and George Austiguy, PE** *GBA*

SUBJECT: **Addendum #2**

The following changes, additions, and clarifications are to be incorporated into the project documents for the *Greenhorn Creek Fish Barrier Project*, FWP#12-24.

1. All equipment brought onto the site will be clean and weed free. FWP & Snowcrest Ranch reserves the right to inspect any and all equipment, and prohibit entrance onto the site until cleaned to the satisfaction of Snowcrest Ranch and FWP.
2. Turner Enterprises, Inc. (TEI), shall be considered an 'agent' of the state, and will be insured, held harmless, and indemnified to the same extent as the State of Montana. The contractor is responsible to ensure that all policies and coverages contain the necessary endorsements for the State, **and TEI**, being listed as additional insured.
3. Disturbed areas shall be minimized. Any disturbed areas shall be revegetated.
4. The existing ditch may be used as part of the water diversion plan. If the existing ditch, or a newly constructed ditch, is to be used in the water diversion plan, the ditch must be lined or have a culvert installed in it in order to limit turbidity. The length of ditch and diversion used shall be minimized.
5. The contractor is required to furnish and maintain a 'porta-potty' for the duration of the project, regardless of whether or not contractor personnel are staying/camping on-site.
6. Camping on DNRC property at the site will be allowed. DNRC rules, regulations, and fees governing camping must be followed. Contact Tim Egan with DNRC at 683-6305 for details.

***Contractor shall acknowledge receipt of this addendum on the Bid Proposal Form.***

**All other contract items remain unchanged.**

**End of Addendum**
